Logging In

Upon opening the program, the user will immediately open the **home page** of *Hog Bank Internal Interface*. The home page will have two text boxes: one for **EmployeeID** and another for **Employee Password**.

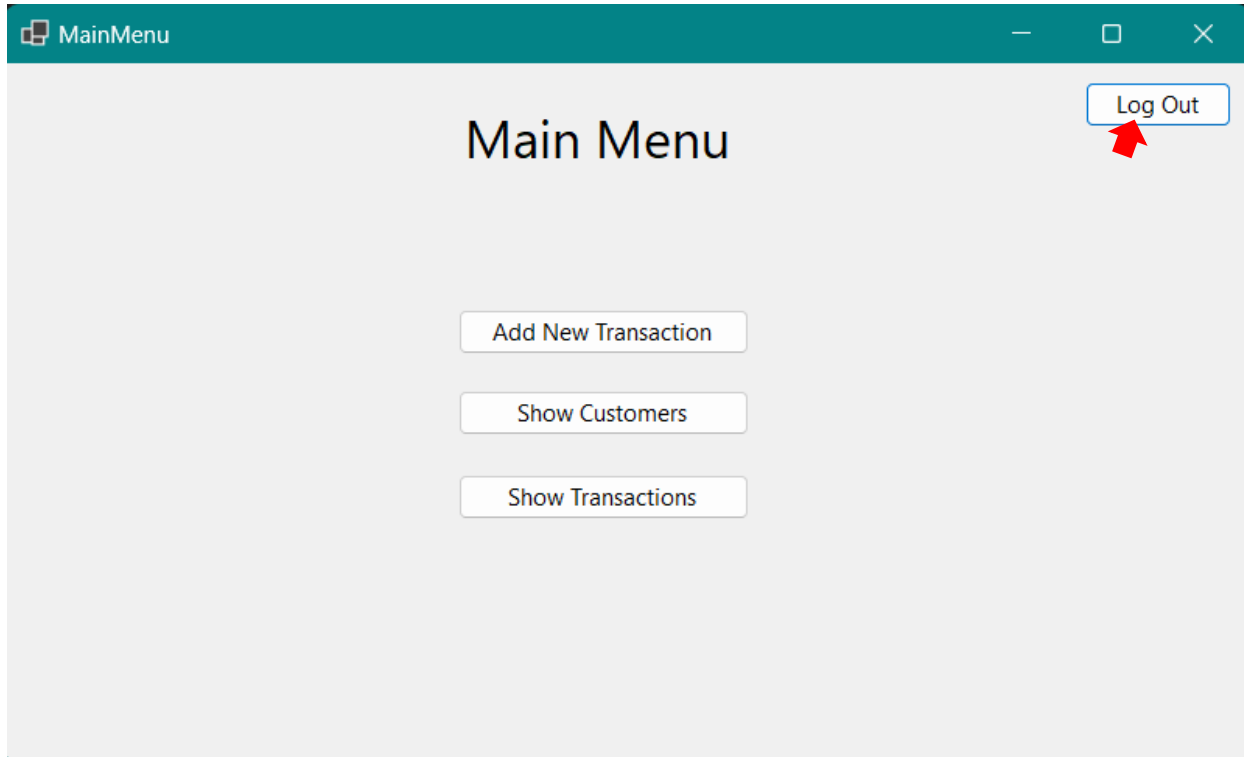

A screenshot of a web application window titled "Login". The window has a teal header bar with standard window controls (minimize, maximize, close). The main content area is light gray and features the title "Hogbank Employee Login" in red text. Below the title, there are two white text input fields. The first field is labeled "Employee ID" and the second is labeled "Employee Password". Below these fields is a white button with the text "Login".

On this page, the user will enter both their employee ID and their assigned password. Then the user will click the **log in button**. If the information entered for **EmployeeID** and **Employee Password** is correct, then the user will automatically be taken to the interface's **main menu**.

A close-up view of the login form. The "Employee ID" field contains the number "11". The "Employee Password" field contains the text "carrie04599". A red arrow points to the "Login" button at the bottom of the form.

Logging Out

Logging out depends on the page the user is on. If on the **main menu** page, the user can simply click the **log out button** in the top right corner of the screen.

When on another page such as **Show Customers** or **Show Transaction** the user must click the **back button** in the top right corner.

This will return the user to the **main menu**, where they can click the **log out button** on the top right.

If on the **Add a New Transaction Page**, leave the boxes empty and click create transaction. This will take the user back to the **main menu** without adding a transaction.

Main Menu

The **main menu** is how the user can access all functions inside of the *Hog Bank Internal Interface*. It includes the **log out button** which will log the user out of the program.

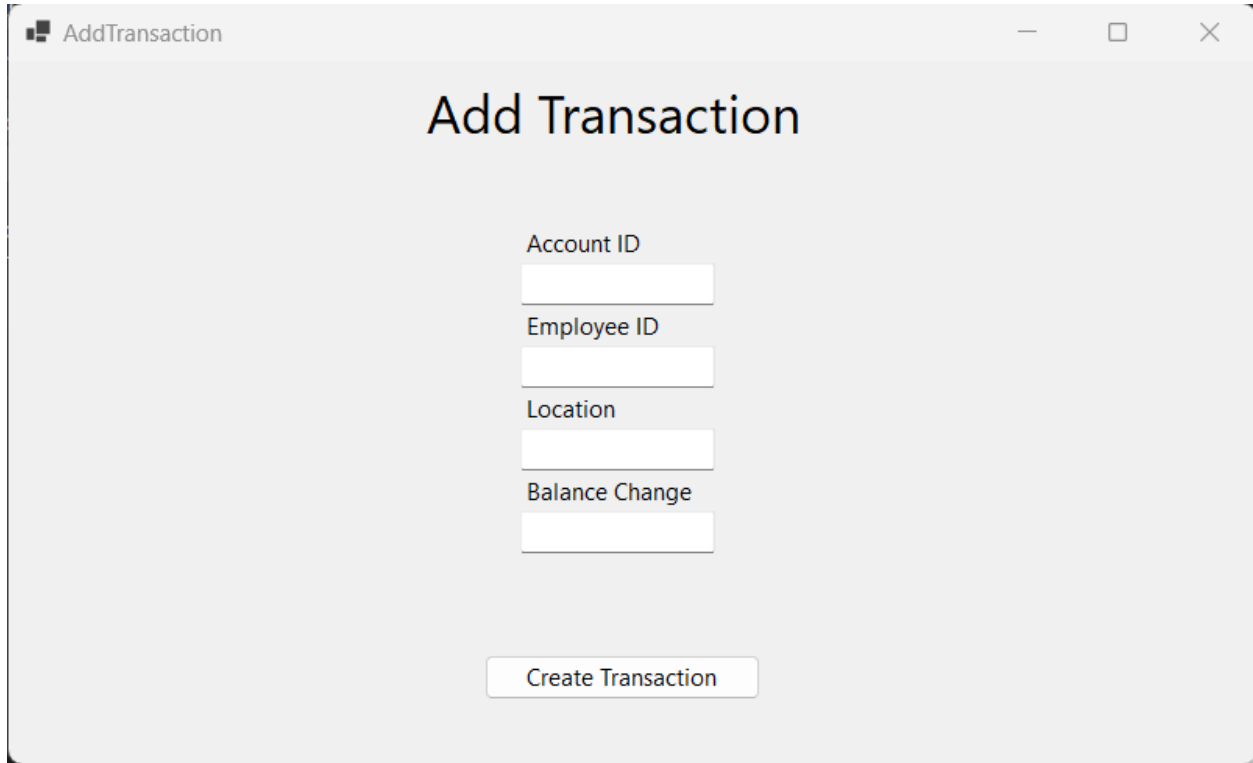

It also includes three other buttons that allow the user to access the **Add New Transaction**, **Show Customers**, and **Show Transaction pages**. Clicking any of these buttons will take the user to the respective page.

Adding a New Transaction

The **Add New Transaction page** allows the user to withdraw or deposit money on a customer's behalf.

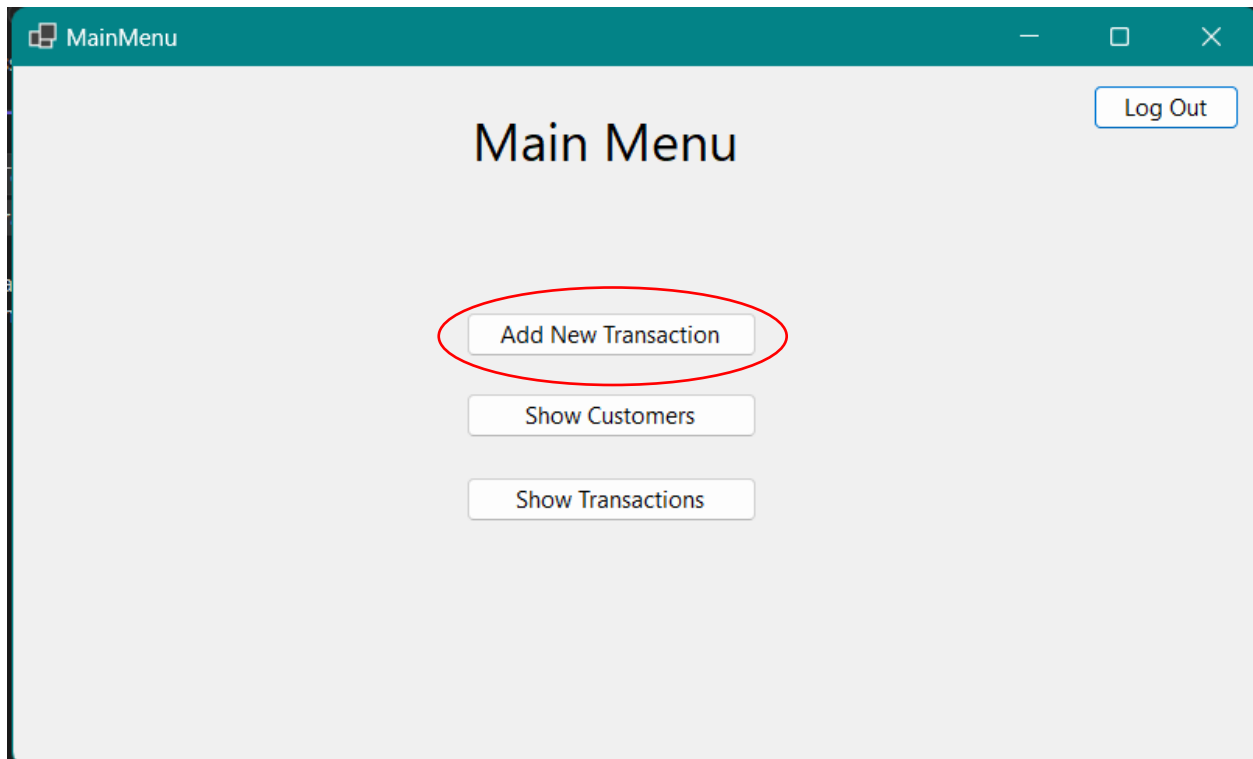

To add a new transaction the user must fill out the following text boxes with the correct information. **AccountID** requires the ID number of the account the customer wishes to deposit to or withdraw from; **EmployeeID** will be the same ID the user used to log in; **Location** is the location of the bank where the transaction is happening; and, **Balance Change** is the amount of money in the transaction (deposits are entered as a positive number, and withdrawals are represented as negative).

Once this information is complete the user can simply click the **Create Transaction Button**.

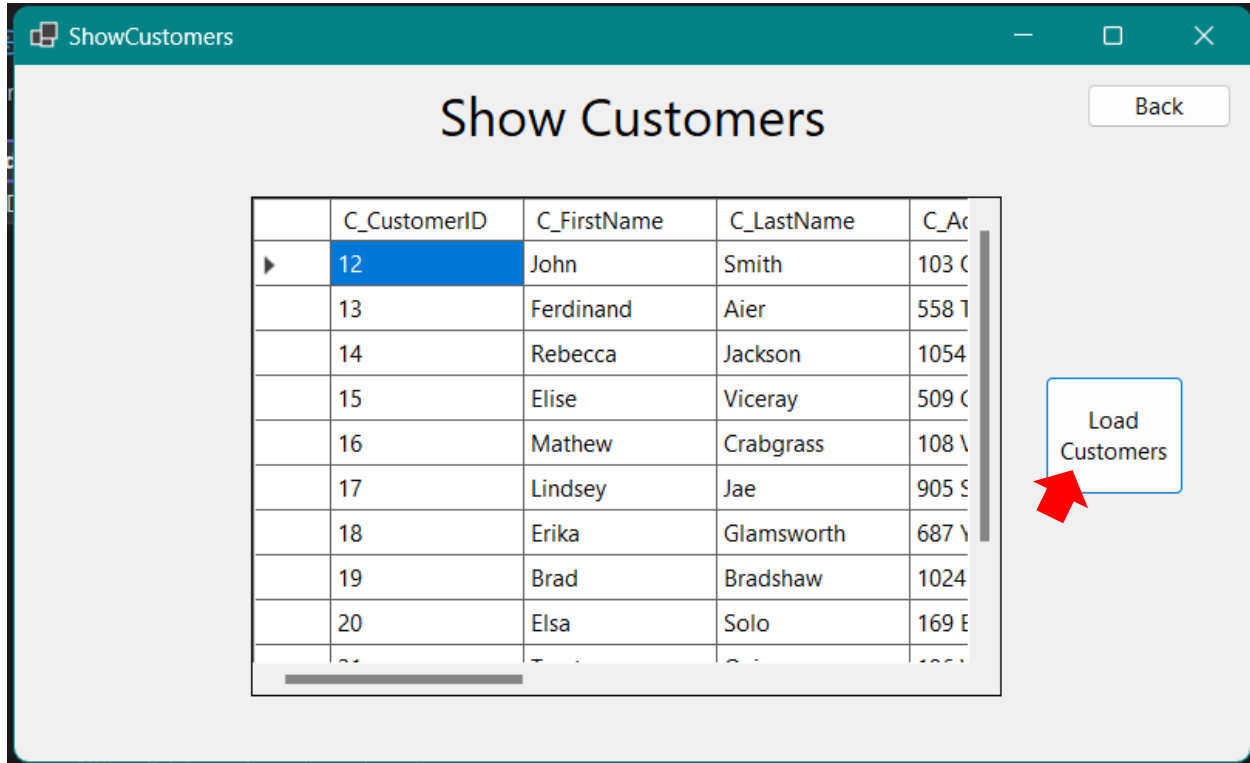

To exit the **Add Transaction Page**, click the **Create Transaction button** but leave all text boxes blank.

To access the page, click the **Add a New Transaction button** on the **main menu**.

Viewing Customers

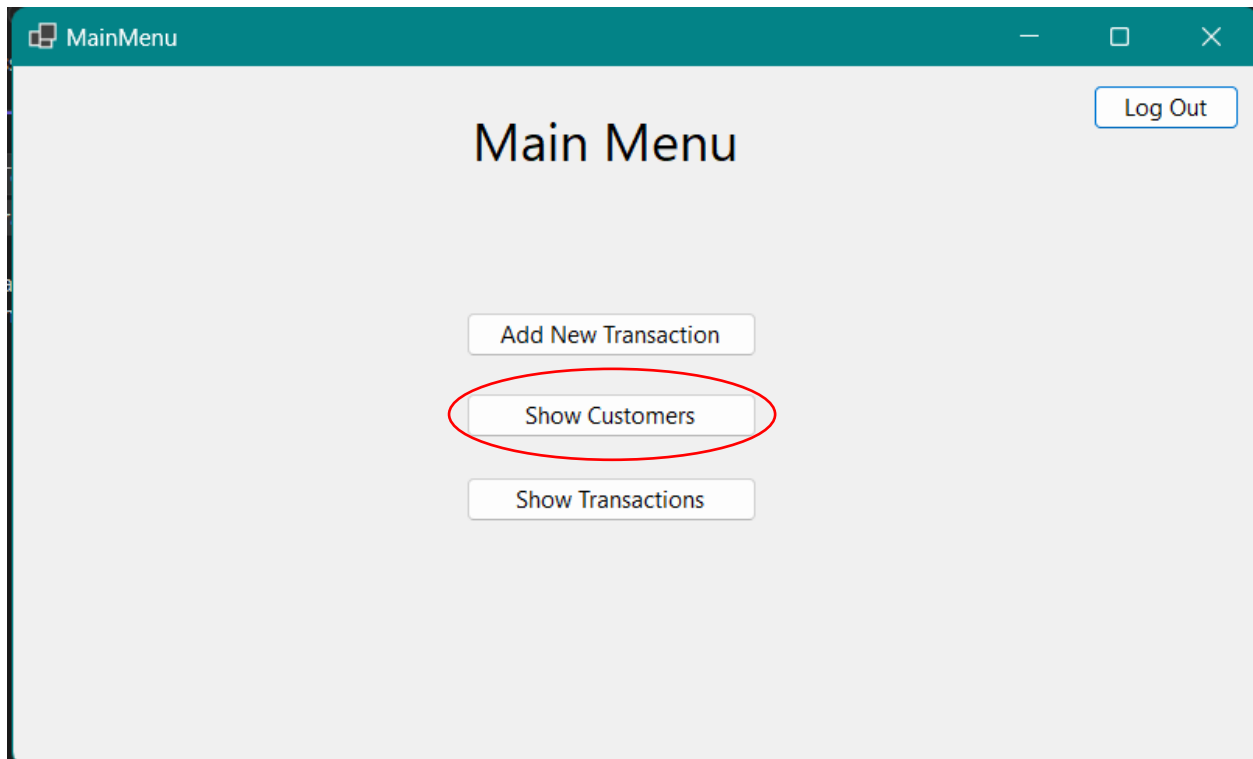

The **Show Customers page** allows the user to view a list of all customer information in the bank. To load the data, click the **Load Customers button**.

To exit the page, click the **back button** in the top right corner of the screen.

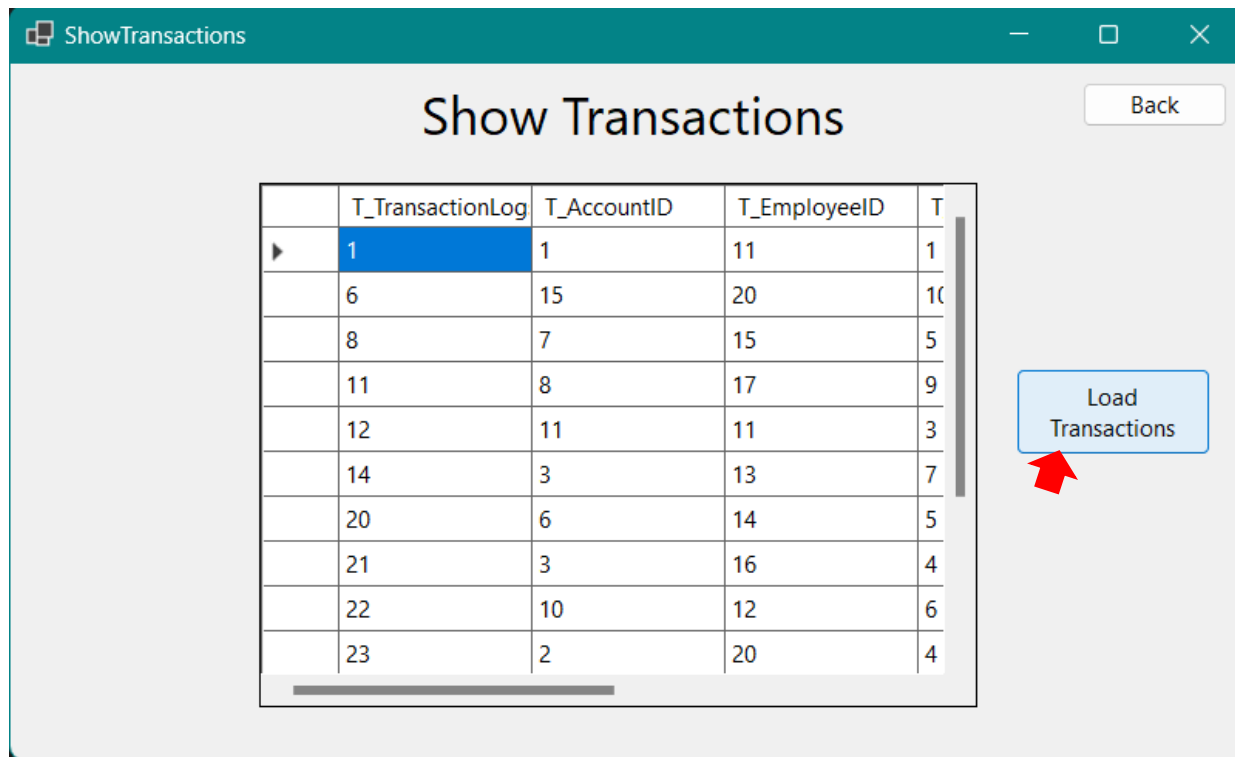

To access the page, click the **Show Customers button** on the **main menu**.

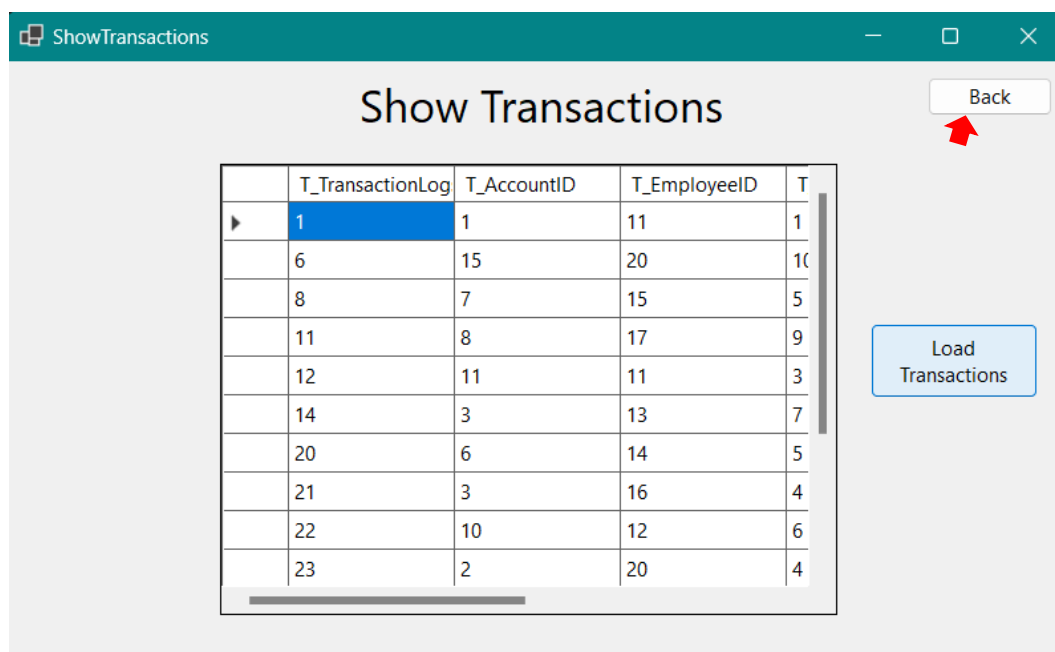

Viewing Transaction History

The **Show Transactions** page allows the user to view a list of all transaction information in the bank. To see the transactions, click the **Load Transactions** button.

To exit the page, click the **back** button in the top right corner of the screen.

To access the page, click the **Show Transactions** button on the **main menu**.
