### PROFESSIONAL SUMMARY

Data Science graduate looking for work in analytics. Passionate about learning and experienced with statistical modeling, analytics, and applied data science. Has experience with collaborative research for a large-scale retail company and various other analytics projects. Highly motivated student currently pursuing an online master's degree in applied business analytics.

### EDUCATION

#### **Master of Applied Business Analytics-** *University of Arkansas, Fayetteville, AR*

AUGUST 2025 – MAY 2027

GPA: 4.0

Pursuing a Master of Applied Business Analytics degree. Enrolled in graduate level courses since Fall 2025. Expected to graduate in the Spring semester of 2027.

#### **Bachelor of Data Science-** *University of Arkansas, Fayetteville, AR*

AUGUST 2022 – MAY 2026

GPA: 4.0

Completed a Data Science Bachelor, concentrating in Business Data Analytics and minoring in Statistics.

### PROJECT PORTFOLIO

A sampling of my project work and research is located on my website:

### SKILLS

|                        |                           |                         |                 |               |
|------------------------|---------------------------|-------------------------|-----------------|---------------|
| <b>Problem Solving</b> | <b>Data Visualization</b> | <b>Microsoft Office</b> | <b>Tableau</b>  | <b>SQL</b>    |
| <b>Data Cleaning</b>   | <b>Data Analysis</b>      | <b>Machine Learning</b> | <b>SAS Viya</b> | <b>SAS EM</b> |
| <b>SAP S/4HANA</b>     | <b>Team Leadership</b>    | <b>Problem Solving</b>  | <b>Python</b>   | <b>R</b>      |

### UNDERGRADUATE RESEARCH

Recently finished an undergraduate honors/senior thesis research project. Collaborated with a team of three data science students alongside a team of data scientists from a large retail company. The project was to optimize fresh product production by improving daily production predictions. Used current product data and implemented machine learning algorithms to detect anomalies within the current predictions to provide solutions that improve financial outcomes.

## EMPLOYMENT HISTORY

### **Academic Tutor for the Athletics Department**- *University of Arkansas*

AUGUST 2024 – MAY 2025

- Worked as a math tutor for the athletics department at the University of Arkansas. Tutoring College Algebra, Pre-Calculus, Calculus I, Calculus II, and Intro to Statistics.
- Met with student athletes to help them solidify their knowledge in math as well as explaining difficult concepts.
- Took notes on student progress during each session to ensure progress with course material.

### **Poll Supervisor**- *Johnson County Election Commission*

MAY 2022 - JULY 2022

- Gathered and led a team of poll workers for the Johnson County local primary election and subsequent runoff election.
- Ensured compliance with election laws and regulations to maintain the integrity of the voting process.
- Trained poll workers on election procedures and protocols.
- Managed and resolved disputes and conflicts that arose during the election process.

### **Math Tutor** - *Arkansas Tech University*

JUN 2022 - JULY 2022

- Math Tutor for Calculus, Pre-Calculus, College Algebra, and Statistics in the Arkansas Tech Math Lab.
- Provide personalized assistance to students, catering to their specific learning needs and helping them improve their math skills.

### **Private Tutor** - *Online Private Tutoring*

AUGUST 2021 - MAY 2022

- Facilitated one-on-one virtual tutoring sessions for a 6th grader in Math, Science, and English.
- Developed and prepared lesson plans to enhance comprehension and engagement with the online curriculum.
- Provided tailored support to reinforce classroom learning and improve academic performance.

### **Early Voting Administrator** - *Johnson County Clerk's Office*

JUNE 2022 - JULY 2022

- Worked with a team of four to run the early voting for the local primary election.
- Handled communications with community members coming to vote.
- Managed and maintained the early voting equipment, ensuring that it was in proper working condition and ready for use during the early voting period.
